In 2021 overall, air cargo volumes rose by 19% year-on-year driven by international trade and logistic disruptions. Volumes were 4% above the pre-crisis 2018 peak.

In 2021 available cargo tonne-kilometers (ACTKs) fell by 11% vs 2019 that was influenced by reduction of belly-cargo capacity of passenger aircraft.

March 2022 saw 5% year-on-year decrease in cargo tonne-kilometers due to Omicron related demand disruptions in Asia, while ACTK’s growth was limited by loss of cargo capacity in Russia and Ukraine.

Already elevated air freight rates continued mostly upward trend in 2021, reaching a peak in Q4. The rise was influenced by supply chain issues, Covid-related lockdowns, reduced capacity and the earlier Lunar New Year.

In 2022 freight tariffs decline was caused by demand disruptions in Asia, which could not be offset by disappearance in cargo capacity provided by the Russian carriers. Nevertheless, rates remain very attractive for air cargo business operations.
PASSENGER TRANSPORTATION SECTOR

Global
In full 2021, global RPKs rose to 42% of 2019 levels (vs 34.2% in 2020) as more markets reopened with vaccination progress.

Air passenger traffic experienced a strong rebound in March 2022, volumes are now the closest to 2019 pre-pandemic levels, at 41% below. Disruption from Omicron (outside of Asia) was brief and the global air travel recovery continues.

Europe
Mass vaccination helped deliver a solid summer 2021 recovery, and traffic remained relatively stable at over 70% since the summer 2021. The war in Ukraine had a limited impact on air travel demand in March 2022, travel within Europe and Asia-Europe performed well.
FY 2021 KEY FINANCIAL HIGHLIGHTS

- Total revenue of the Group increased by 46% YoY and remains 8% below 2019 pre-pandemic levels

- EBITDA growth 42% YoY

- Aviation Support Services and Passenger ACMI are expected to show significant improvement in 2022 following dropped Covid pandemic related restrictions

- Aircraft Trading & Portfolio Management shifted focus from external customers to internal and will continue to support Group fleet growth

- Total revenue of the Group increased by 46% YoY
- Growth of employee expenses is related with recovery of business, especially in passenger ACMI sector as well acquisition of new companies
- Decrease in depreciation expenses is driven by renegotiation of ACMI aircraft lease-in contracts (decrease in IFRS16 liabilities)
- Other gains mainly include income from the renegotiation/termination of passenger ACMI lease-in contracts and other rent concessions, all Covid-19 related
- Government support during 2021 amounted to €11 m vs €19 m in 2020, mainly in Scandinavian & UK markets. No specific bailout support was received by any group company

Glossary on Alternative Performance Measures (APM)

This presentation also contains certain “non-IFRS financial measures”, i.e. financial measures that either exclude or include amounts that are not excluded or included in the most directly comparable measure calculated and presented in accordance with IFRS.

Pro-Forma for 2019:

a) In 2019, the Group was reorganized and grew substantially in size, through the completion of the acquisition of four different groups of companies: Smartlynx Airlines SIA, Avion Express UAB, AviaAM Leasing AB and Chapman Freeborn Holdings Limited (the “Reorganization”);

b) All pro-forma financial statements in this presentation are unaudited and present the Group’s hypothetical results as if the Reorganization (as defined above) had taken place and was completed on 1 January 2019;

c) The information provided in this presentation does not represent and is not intended to be presentation of consolidated financial information in accordance with IFRS, and does not contain all the necessary adjustments that may be required under IFRS and any applicable law. Accordingly, the information contained herein is not comparable to the consolidated periodical financial information released by the Group.

EBITDA: Group’s EBITDA is calculated as profit (loss) from continuing operations before income tax plus depreciation and amortisation, finance costs – net, and adjusted for the results of equity-accounted investees and significant non-recurring transactions. EBITDA is presented because in the Group’s opinion this is a useful measure of the results of operations. EBITDA is not defined by IFRS and should not be treated as an alternative to the profit (loss) categories provided for in IFRS as a measure of the operating results nor as a measure of cash flows from operating activities based on IFRS. Neither can it be treated as an indicator of liquidity.

ADJUSTMENT is an alternative performance measure used by ASG, which includes material charges or profits caused by movements in provisions related to assets, restructuring, or foreign exchange impacts as well as capital gains/losses from the disposal and acquisition of businesses.

CASH POSITION: ASG defines its consolidated gross cash position as the total of (i) cash and cash equivalents in banks and non-bank global payment providers, and (ii) up to 3 months deposits in banking financial institutions.

NET DEBT: For the purpose of capital risk management, the Group does not include the convertible preferred shares liability in the net debt calculation, since it is not subject to redemption via a cash outflow upon the expected conversion.
